

Wesdome Announces 2017 Fourth Quarter and Full Year Financial Results

TORONTO, March 21, 2018 -- Wesdome Gold Mines Ltd. (TSX:WDO) ("Wesdome" or the "Company") today announces fourth quarter ("Q4 2017") and full year 2017 financial results. All figures are stated in Canadian dollars unless otherwise noted.

Mr. Duncan Middlemiss, President and CEO commented, "Our 2017 results exhibit several operational and financial improvements at Wesdome. We slightly exceeded the upper end of our production guidance, mined significantly higher head grades, improved profits, and met the mid-point for our cash cost and all-in sustaining cost guidance. Looking ahead, we expect this trend to continue with 2018 costs to decrease a further 10% and gold production to increase by approximately 10% to 62,000 – 68,000 ounces as per our guidance."

"In 2018 at the Eagle River Complex, we are committing all exploration efforts to the Eagle River Underground Mine, where reserves currently stand at 416,000 ounces at 12.2 grams per tonne. A main goal of this program is to identify additional mineralization along the eastern extension of the 300 and 7 zone parallel structures, located to the north and parallel to the main 8 zone, to create additional workplaces and thereby realize our objective of providing additional high grade ore to the mill. We are beginning a higher grade mining cycle at this operation that should continue for the foreseeable future."

"At Kiena, the exploration ramp is nearing completion and last week we resumed drilling, with two drills on the higher grade Zone A and Upper Quartz Zone of the Kiena Deep discovery. A third drill is expected to be added in April to this area. The plan at Kiena this year is to complete 50,000 metres of underground drilling, in order to be in a position to generate a potential resource calculation on the Kiena Deep discovery. This will determine timing and next steps at this asset."

Key operating and financial highlights of the full year 2017 results include:

- Gold production of 58,980 ounces from the Eagle River Complex, a 24% increase over the previous year (2016: 47,737 ounces):

Exploration & Corporate Development Highlights for 2017
<p>Eagle River</p> <ul style="list-style-type: none">• At Eagle River, continued drilling has now traced the 300E structure from 750 metres ("m") depth to 1,000 m depth and remains open up and down plunge. Drilling highlights include 51.93 g/t Au (23.18 g/t Au cut) over 11.96 m true width.• Development to date on the 300E Zone has identified seven subzones on the 844-metre level ("m-level"). The combined ore strike length of the subzones are 173.7 m with a weighted average width of 2.85 m and cut and uncut gold grades of 22.62 g/t Au and 34.79 g/t Au, respectively.• Continued drilling to explore the 300W Zone has now traced the mineralization 300 m up-plunge and remains open to the west and up-plunge. Highlights include 41.99 g/t Au cut over 2.72 m true width.• Resource definition drilling at Mishi completed in 2017 returned positive results from two areas located 600 m and 1,700 m west of the existing open pit mining operations. Wesdome is currently assessing these occurrences and building them into a long-term growth scenario for mining at Mishi.
<p>Kiena</p> <ul style="list-style-type: none">• Development of the Kiena Deep exploration ramp continued with 878 linear metres completed to date and is expected to be completed by the end of March 2018. Early results from Kiena Deep B zone indicate moderate to locally higher gold grades obtained with occasional visible gold observed. Results include 34.37 g/t Au uncut (24.16 g/t cut) over 4.5 m core length (1.6 m true width) in hole 6186.• As the ramp development is continuing, one drill has been actively drilling several auxiliary targets near existing underground development including the S-50 and VC zone sectors and has returned encouraging results, including 6.68 g/t Au uncut (6.02 g/t Au cut) over 37.6 m core length and 17.89 g/t Au uncut (16.3 g/t Au cut) over 6.0 m core length from S-50 zone.• Ramping is expected to be completed in March and will enable the Company to drill the higher grade Kiena Deep A zone shortly thereafter.
<p>Moss Lake</p> <ul style="list-style-type: none">• Drilling at Moss Lake was completed along the strike of the existing resources to significantly extend mineralization over an additional strike length of 4.5 kilometres. The project has been kept on care and maintenance since the fall of 2017 to allow the geological team to focus its attention on the Eagle River Complex and the Kiena gold deposits.
<p>Corporate</p> <ul style="list-style-type: none">• The appointment of two former mining executives as directors and a new management team in mid-year to steer the Company to increase production and profitability.
